BRNO, CZECH REPUBLIC**

Mendel Genetics Conference

A tribute to Gregor Johann Mendel at his birth bicentennial

A key interdisciplinary genetics event discussing the development of the science
from Mendel's discoveries to the future

Sessions on the human genetics (inherited disorders, cancer genetics, gene therapies).
Sessions on the plant genetics, animal genetics, genetics of microorganisms.
Novel emerging technologies in genetic research.
Ethical questions in genetics, visions in genetics.
The history of genetics: more than a century of international
research into the life and legacy of Gregor Johann Mendel,
the origin of genetics, and its development.

Key note speakers:

Prof. Ada Yonath, Weizmann Institute of Science, Israel
Sir Paul Nurse, The Francis Crick Institute, UK
Prof. Thomas Cech, Ph.D., University of Colorado Boulder, USA
Prof. Kim Nasmyth, University of Oxford, UK
Jakub Tolar, MD, PhD, University of Minnesota, USA
Jan Korbel, Ph.D., EMBL Heidelberg, DE
